

# *Automate Import Management using REST API*

## **Steps to be followed :**

1. Upload data file in UCM Server using GenericSoapPort SOAP Service. Post successful invocation, the service returns Content ID.
2. Submit Import Activity using importActivities REST API.
3. Get the status of the import activity using importActivities REST API.
4. Once the process is completed, download Imported Record Report and/ or Error/ Exception Report using GenericSoapPort SOAP Service.
